

# COMODO

Comodo offers a modular system where simple smart components can be used individually or linked, to provide whatever scenario you need.

Comodo is a collection of modular lounge seating designed to expand the functional repertoire of lounge seating. Traditionally, the office lounge was located adjacent to the reception desk and intended to serve as a waiting area for visitors. Employees rarely used the space. In the contemporary office, the lounge often functions as a space for collaborative work and requires furniture that provides greater flexibility. Comodo is designed to support collaborative work wherever it occurs throughout the office.
