

NUVEM

DESIGN WITH A STORY

The Nuvem chair has not only a stylish appearance, but also a comfortable and multi-used lounge chair with humanization design. The philosophy of development is based on providing perfect sitting comfort to users. Adopt current trend of modern design elements to show the versatility and diversity.

01 **UNIBODY 410MM FOUR STAR ALUMINUM BASE**

Unique Aluminium base is machined from single piece of aluminum, allow hold up to 1800kg, strength and lighter than a comparable steel or wood base.

02 **ROTATING BAR**

This allows chair provide 360 smooth swivels and stability on reclining movement.

03 **UNIBODY ALUMINUM BODY FIT SUB SKATING RECLINE SYSTEM**

The multi functional body fit sub skating mechanism has build internally under flat shape unibody aluminum case, its thin and strength. Integrated to one piece beauty stylish design, this allow to provide perfect comfort and support to your back, thus reducing back fatigue. With stage less memory position locking function, allows you simply adjust your best comfort ergonomic position.

04 **ENGINEERING MONOMER CAST-ING NYLON FRAMES**

Supporting frames has adopted environmental high recyclable rates engineering Nylon material. With its high strenght and elastic characteristic, his enabled perfect matching upholster with high tech mesh fabric. This combination has break traditional steel and wood frames, gives unmatched sitting comfort.

05 **UNIBODY ALUMINUM ARMREST**

The armrest has adopted high strength aluminum material, with elegant stylish appearance design.

06 **ERGO ADJUSTABLE HEADREST**

Without changing recline position, user can simply adjust height of headrest to suit for personal comfort receiving best support to neck region.

07 **GENUINE TOP GRAIN LEATHER ARM PAD**

We are using imported Europe top grain Leather, upholster above PU pad gives soft and gentle touch feeling.

08 **HIGH DENSITY SEAT FRONT EDGE SUPPORTING MOLD FOAM**

The waterfall seat front edge design adopt high density supporting mold foam ensure the user getting best support and receiving minimize leg pressure, providing best sitting comfort.

09 **SUPER SOFT TEMPERATURE ADJUST TECH FOAM**

Adopt most advance technology and special formulated material, this enable to increase foam's water content, allow adjust temperature. This has improved the sedentary sultry situation from traditional polyurethane foam. Moulded on top of high density soft supporting memory foam, this combination create a excellent support comfort.

10 **HIGH DENSITY SOFT SUPPORT-ING MEMORY FOAM**

The high density soft supporting memory foam, mould over high elastic tech mesh fabric, this combination provide best support and soft comfort, the tradition soft polyurethane foam are unable to create this elastic gentle soft support comfort to user.

11 **IMPORTED HIGH TECH MESH FABRIC**

The high technology mesh fabric, replace traditional steel frame and spring, our mesh has strength on toughness and elastic, provide best support and ensure durable construction.

12 **IMPORTED GENUINE TOP GRAIN LEATHER COVER FRONT AND**

The imported Top quality genuine top grain leather come from natural product, with light surface treatment provides a certain protection. The soft gentle allow to provide perfect comfort to use, Nuvem leather chair is on of the complementing design no matter in home or office environment.

THE GENIUS
TECHNOLOGY
OF NUVEM

TECHNOLOGY
